THE YEAR BOOK OF THE
PROVINCIAL INSTITUTE
OF TECHNOLOGY & ART
CALGARY - ALBERTA

1957 - 58

EDITORIAL

Possibly the greatest disease of our time is the emphasis of our society on materialistic objectives — on the belief that success is synonymous with financial achievement. We cannot deny the necessity of money, but to make it the criterion in choosing a career is basically wrong.

Curiously enough, the materialistic attitude which has formed a large part of our contemporary social structure, has also affected our country's educational system. This emphasis in education is by no means a national one, but it is nevertheless a serious problem and one which requires of those who want more than just "a little learning", a reassessment of held values. Values once formulated should only be adopted and then asserted by the individual after the intrinsic qualities of those values have been carefully tested. It is my conviction that some, and my hope that all, graduates of Tech will be among those who select their values creatively.

The creative spirit is one of God's greatest gifts and in one or other degree can be employed in every field of endeavour. This spirit is the distinctive expression of the individual. No matter whether one belongs to a group of artists, mechanics, or engineers, the way in which one performs one's tasks can always be made more creative through initiative and ingenuity.

This book is a book of recollections. However, do not continually think of it in terms of the past: think of it also as a symbol of the future — a symbol of the potentialities each of us possesses. With the precise training we have received, we are now in a position to exploit those possibilities.

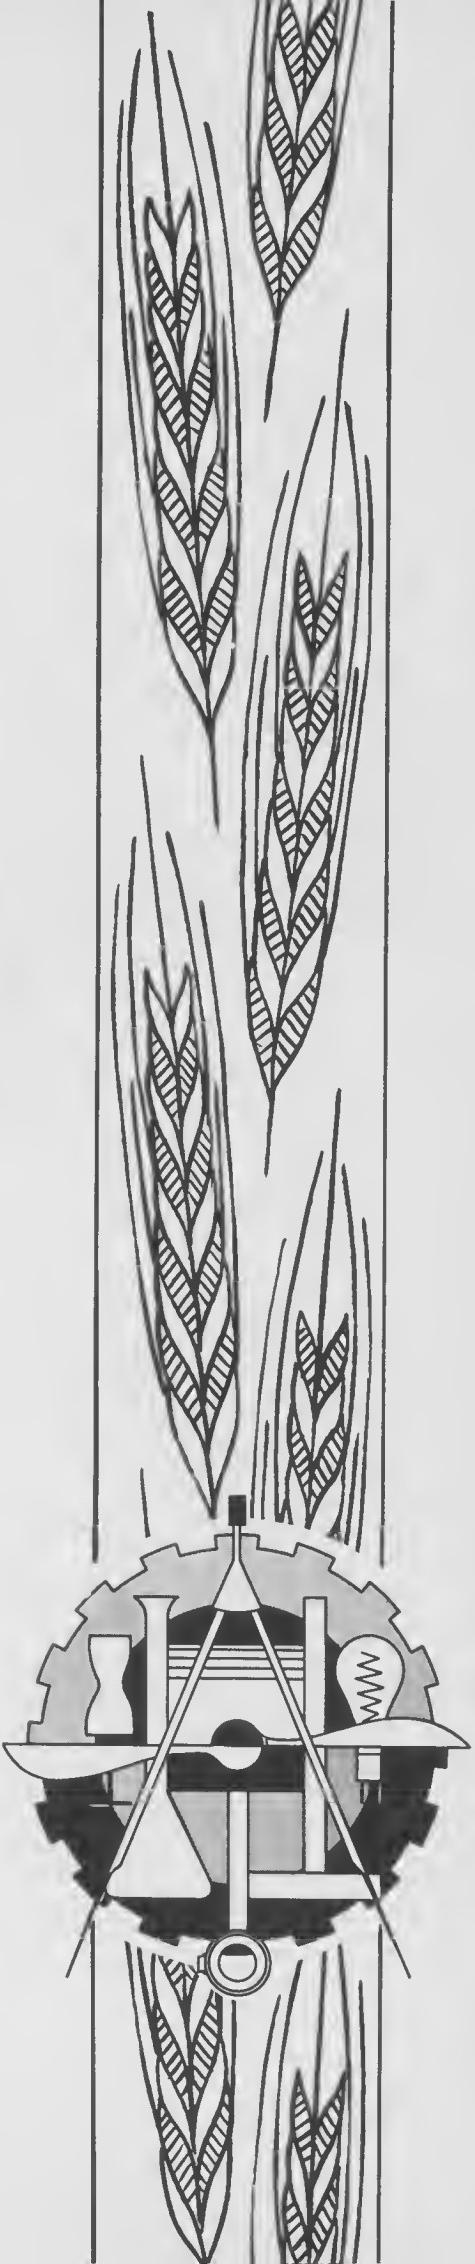

"Every revolution was once a thought in one man's mind." — Emerson.

My sincere thanks go out to the year book staff for their wonderfully co-operative spirit and to all the instructors who, in their advisory capacities, greatly assisted in the compilation of this book. Thanks are also due to the class representatives for their generous help. I would like to see their function continued in future years.

DELI SACILOTTO,
EDITOR.

DEDICATION

This issue of the Tech Art Record is dedicated to Canada, whose future development rests largely on the training of its technicians and artists, and to all the instructors under whose guidance the die is being cast.

The Year Book editors wish to express their most sincere thanks to Mr. Clarke, Mr. Jorgensen, Mr. Blodgett, Mr. Middleton, Mr. Howarth, Mr. Parsons, Mr. Grywalski and to all of the students who so generously gave us their assistance in the organization, the completion and the publication of this book.

**A Message to
the Students from
Hon. A. O. Aalborg**
Minister of Education

The preceding year has seen momentous changes in our contemporary world. Science, wedded to technology, has produced man-made machines which have penetrated outer space. Such fantastic topics as the establishment of national sovereignties on the moon are being seriously debated by outstanding experts in the fields of law and government. The invention of self-propelled missiles of destruction has altered the basis of power, creating problems for those concerned with human relations as well as those responsible for the development of instruments for defense. The remainder of this century promises, if not security, at least the excitement of conquest on strange and distant frontiers. Nothing comparable has happened since the discovery of the Americas in the sixteenth century.

Certainly institutes of technology have an important role in the period that lies ahead. The industrial machine that must support our present standard of living, and, at the same time, provide instruments for the conquest of space, will require an increasing supply of scientists and technologists. The Calgary "Tech" is one of the many institutions which will be needed throughout our country if we are to develop the human resources necessary to keep this machine in action.

We look to the graduates of the Institute to assume important roles in our increasingly technical society. May I wish you every success in your chosen fields.

ANDERS O. AALBORG
Minister of Education

**A Message to
the Students from
E. W. Wood**
Principal

In bidding farewell to you, the Institute graduates of 1958, I should like to say that it has been a privilege for us to have been associated with you. Partly as a result of this association, it is now our hope that as you go out into the world, each one of you will grow and continue to grow by coping with the challenges and problems of the work at hand. Your connection with the Institute has, we trust, enabled you to develop those qualities which underlie continued success. Such qualities as concentration, curiosity, and enthusiasm should become a permanent part of you.

There is no doubt that each of you will enter the world of industry with the highest hopes. As a recipe for success, may I suggest that first of all you learn to appraise, with a fair degree of accuracy, your personal strengths and weaknesses, and your real interests. Secondly, if you are to succeed and to move ahead, it is absolutely essential that, in addition to possessing basic knowledge, you learn how to detect a problem, gather additional information for yourself, and apply that information. Only in this way will you effectively solve problems. In other words, it is most important that in your development you learn to think for yourselves.

Equally important in the development of a successful career is imagination. This is sometimes called "restlessness". By this I mean the development and maintenance of sufficient curiosity to go beyond immediate requirements, to look for a better way, to evaluate what has been done, and to project possible improvements. Technological advancement is possible only if the curiosity, the imagination, the restlessness of the individual enables him to see opportunities for improvement. A technician who believes that there is little new to be invented or developed is unlikely to keep pace with the very rapid technological advances we expect in the future.

Besides imagination, it is very important to develop the element of judgment. Judgment is involved to a greater or lesser degree in the performance of every job. A person whose judgment is poor may fall at one of two extremes. On the one hand, he or she may neglect detail, overlook implications, or make careless mistakes. On the other hand there is faulty judgment in too great attention to detail. A person guilty of this tends never to get anything done. He strives for perfection far beyond the practical limit. The development of judgment then is largely the development of balance, or common sense.

Finally, in my opinion, the quality which governs most the general development of the successful technician is that of energetic interest or enthusiasm. Fundamentally, development is something which a person accomplishes for himself. If a person is interested in his work, if he has a real drive or ambition to get ahead, and if he responds with enthusiasm to the situations in which he finds himself, he is almost certain to succeed. Lack of ability in a person is only very rarely the cause of failure. More often it is a lack of persistence, a lack of drive, a lack of enthusiasm and a failure to do one's best. The man who does not keep abreast of the technological advances of today, falls further and further behind, and eventually drops out of the picture. To keep abreast requires both formal and informal study, as well as drive and enthusiasm.

As you leave the Institute to take your places in the rapidly expanding world of industry, it is my hope that while here you have learned some of these essentials for success.

E. W. WOOD,
Principal.

This year a number of cover designs for the Year Book were submitted by some of the advanced Commercial Art students. It was felt that due recognition should be made to the artist whose design was chosen. The one selected and used was designed by Ken Samuelson, a 1958 graduate of the Art Department.

SPRING TERM STUDENTS' EXECUTIVE

BOB NELSON

A position on the Executive Council of the Students' Association at Tech is much more than just a responsibility. It is an opportunity — an opportunity to meet, work with, and enjoy the friendship of many instructors and students whom normally one would not have known.

To the succeeding students at Tech I say, "If you are given the choice of running for a position on the Council, do not turn it down. It is one of the most rewarding experiences at the Institute."

I wish to thank the Institute staff, my fellow Council members, and students for their co-operation and help in making my term as President a most enjoyable and memorable period of office.

ROBERT NELSON,
Spring Term President.

FALL TERM STUDENTS' EXECUTIVE

EDWARD FREDERICKS

Everyone cherishes memories of outstanding events in his life, because of the joy and honour which these events continue to provide. A period in my life that has been full of such occasions, and which I shall always remember with happiness, has been my term of office as student president.

It was indeed a pleasure to work with an active executive, and to receive wholehearted co-operation from members of the student body. My sincere thanks are extended to Mr. Wood, Mr. Saunders, and other members of the staff, for their kind understanding and keen interest in student activities.

Best wishes to the graduating classes for successful, life-long careers. May future classes find Tech as interesting and as enjoyable as I have!

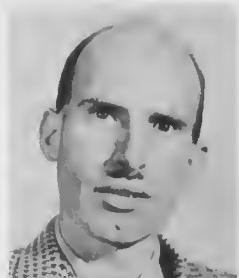

ED FREDERICK,
President.

FOURTH ANNUAL SCHOLARSHIP AWARDS DAY

Held Wednesday, November 6th, 1957 at 2:30 p.m. — Chairman Mr. E. Wood, Principal

Guest Speaker

MR. C. U. DANIELS

Chairman of the Board, Royalite Oil Company Limited
President, Calgary Chamber of Commerce

Scholarships	Awarded to
\$35 A. C. Fuller Scholarship — Art	ALEX JANVIER, Beaver Crossing, Alberta
\$10 Alberta Drafting & Blue Print Co. Award — Art	TERRENCE V. SYVERSON, 9 Somme Cres., Calgary
\$100 Alberta Provincial Command Canadian Legion Scholarship Veteran or child of a Veteran	VERA G. GARTLEY (Art), 12403-91 St. Edmonton
\$150 Alberta Wholesale Implement Association Scholar- ship — Agricultural Mechanics	ROBERT JOHN GRAY, Carmangay, Alberta

ALEX ROSS MEMORIAL SCHOLARSHIPS

\$211 Architectural Drafting Technology	LARRIE R. TAYLOR, Carstairs, Alberta
\$211 Automotive Service Technology	A. BLAKE GORDON, 762 St. Paul St., Kamloops, B.C.
\$211 Commercial Art	BILL R. BROWNridge, 2835 - 23A St. N.W. Calgary, Alberta
\$211 Construction Technology	AKIRO TOMIYAMA, Taber, Alberta
\$211 Industrial Laboratory Technology	LORENA J. NORTON, Aldersyde, Alberta
\$211 Land Surveying Technology	RONALD B. STOTHERS, Empress, Alberta
\$211 Radio & Electronic Technology	EDWARD M. FREDERICK, Busby, Alberta
\$25 Anonymous Award — Art	JAMES L. ELLIOTT, 1418 Child Ave., Calgary
\$100 Blackwell Electric Scholarship—Industrial Electrical Technology	ROBERT ANDREW STEWART, Creston, B.C.
\$50 Calgary Business & Professional Women's Club Scholarship — Art	VERA G. GARTLEY, 12403 - 91 St., Edmonton
\$150 Calgary Motor Products Scholarship — Automotive Service Technology	GEORGE W. MOFFITT, Radway, Alberta
\$150 Calgary Power Limited Scholarship — Industrial Electrical Technology	CALVIN LITZENBERGER, Wetaskiwin, Alberta.
\$500 Canadair Aeronautical Engineering Scholarship — Aeronautical Engineering	EMIL BERG (\$250), Seba Beach, Alberta, and NORMAN N. SACHKIW (\$250), 9203-92 St. Ed- monton, Alberta.
\$10. Canadian Art Galleries Award — Art	DELI D. SACILOTTO, Kimberley, B.C.

CANADIAN WESTERN NATURAL GAS COMPANY SCHOLARSHIPS

\$50 Art	LESLIE GRAFF, Bashaw, Alberta.
\$25 Clothing and Design	ELLA M. GRUNAU, Olds, Alberta.
\$150 Mechanical Technology	Not awarded for the current year.
\$150 Land Surveying Technology	AMIL E. GANSKE, Pincher Creek, Alberta.
\$150 Central Scientific Company Scholarship — Industrial Laboratory Technology	CLAUDE J. AUBANEL, 409 Roxboro Rd., Calgary, Alberta.
\$50 Commercial Agencies Award — Drafting	MICHAEL VERBISKY, 12402-82 St., Edmonton, Alberta

*Scholarships**Awarded to*

\$50 Crown Lumber Company Scholarship — Construction Technology	Not awarded for the current year.
\$150 General Supplies Limited Scholarship — Automotive Service Technology	WILLIAM R. GRAHAM, 166-12th St., S.E., Medicine Hat, Alberta.
\$25 Henry Birks & Sons Scholarship — Art	KENNETH C. SAMUELSON, 1433 - 5th St. N.W. Calgary, Alberta.
\$35 Hudson's Bay Company Scholarship — Art	ARTHUR D. WALTER, 1577 Chinook Ave., Bowness, Alberta.
\$50 Local Council of Women Scholarship — Art	BILL R. BROWNridge, 2835-23A St., N.W. Calgary, Alberta.
\$150 Maclin Motors Limited Scholarship — Automotive Service Technology	GORDON J. WOLDUM, Nakusp, B. C.
\$150 Manning Egleston Lumber Co. Scholarship — Construction Technology	ERNEST L. KOETKE, Holden, Alberta.
\$100 Mrs. Frederick Charles Manning Memorial Scholarship — Art	KEITH L. THOMSON, 2424-6th St., N.W. Calgary, Alberta.
\$150 Northwest Industries Limited Scholarship — Aeronautical Engineering	PAUL MOLLER, Fruitvale, B. C.
\$10 Paint and Arts Supply Limited Award — Art	DOUG H. HAYNES, 1338 King St., Regina, Sask.
\$150 Revelstoke Sawmill Co. Limited Scholarship — Construction Technology	Not awarded for the current year.
\$150 Robin Hood Flour Mills Limited Scholarship — Industrial Laboratory Technology	TOKIO Hori, Taber, Alberta
\$250 Shell Oil Company Scholarship — Drafting Technology	ERIC J. CRAIG, Fort Simpson, N.W.T.
\$150 Sherritt Gordon Mines Limited Scholarship — Industrial Laboratory Technology	DAVID W. SMITH, 120-20A St., N.W., Calgary, Alberta.
\$100 Singer Sewing Machine Co. Scholarship — Clothing and Design	MARGARET LITCHFIELD, Blackie, Alberta.
\$150 Smalley's Radio Limited Scholarship — Radio and Electronic Technology	RAY L. LEMKE, Acadia Valley, Alberta.
\$25 T. Eaton Co. Limited Scholarship — Art	DELI D. SACILOTTO, Kimberley, B.C.

MAY 1958

*Scholarships**Awarded to*

\$100.00 Department of Economic Affairs Scholarship Food Service Training	DALE F. KRAEMER, Calgary, Alta.
\$ 75.00 Department of Economic Affairs Scholarship Food Service Training	NELDA F. BELL, Calgary, Alta.
\$ 50.00 Department of Economic Affairs Scholarship Food Service Training	ADOLINE BREDAFELDT, Medicine Hat, Alta.
Telegraph Key, Smalley's Radio Limited Award Commercial Wireless Operating	RAY FLECK, Ponoka, Alta.

SPORTS AND ACTIVITIES

AERO CLUB

The Society of Aeronautical Students, now in its sixth consecutive year of operation, and one of Tech's most active organizations, boasts sixty members plus an active Alumni group of about forty members.

The club has its own club room and maintains a relatively extensive library exclusively related to aviation. The club also owns and operates a completely functional Link Trainer on which basic instrument-flight training is given to members at a nominal cost. Presently under construction is a French designed, fully aerobatic, sailplane, the Fauvel AV-36.

Bi-monthly meetings are held, featuring special speakers and a variety of technical films. An active social program is maintained and various special events are planned, such as a tour through Edmonton's Northwest Industries' plants. The annual Aero Banquet is once again being prepared for, and is to be held near the end of the term. The club publishes, monthly, its own paper, the **Airscoop**, copies of which are distributed to both local and Alumni members.

The S.A.S. executive this year is comprised of Keith Olson, President; Warren Sinclair, Secretary-Treasurer; Carl Healy, Social Chairman; Russ Stauffer, Link Trainer Committee Chairman; Serg Page, Glider Committee Chairman; Robert Nelson, Alumni Secretary; Fred Priestley-Wright, Publicity Chairman; Allan Palister, Public Relations Chairman; Curtis Vail, Program Committee Chairman; and Staff Sponsor, Mr. G. H. Rhynning.

AGRICULTURAL MECHANICS CLUB

We, the "Ag Mech" students, came to the Tech to acquire knowledge that pertained to our interests. But, in addition, once again the Tech-Ag-Mech (7 a.m.) Club sought to bring about good fellowship between the students of the Agricultural Department and students in other departments. Man cannot live by bread alone, not even whole wheat.

The club, as a body, set achievements to be reached. The club executive carried out many of the suggested activities only because of a group of ardent supporters. Each member received benefits only in proportion to the effort he put forth for the club. As in any organization, some people contributed out of all proportion to their number.

The 7 a.m. Club's ideals are that each student of the Tech become a first-rate citizen and have the best success in his chosen field.

ARCHITECTURAL DRAFTING SOCIETY

A.D.S. was formed this year for the first time. The main objectives of this society are to improve relations between first and second year students, to establish an architectural library, and to foster relations between students and industrial firms.

In the middle of January, the club sponsored a dance, "The Blueprint Ball," in co-operation with Drafting Technology. In February the members built a model home for display at the banquet. Before the year is over, the club hopes to obtain architectural films and speakers, and to visit a few building sites.

The 1957-58 executive consisted of:

President	Andy Saly
Vice-President	Paul Garrick
Secretary-Treasurer	Elfreda Parrott
Social-Education Chairman	Gil Carlson

ART DISCUSSION GROUP

With a notable increase in membership, the Art Discussion Group has enjoyed one of its most heartening and successful years to date. It has been the aim of this group to bring to all its members a variety of art forms, as well as those purely visual.

This year the group heard a very fine lecture by a former director of the Juilliard School of Music in New York, Mr. Baumann. Several outstanding films were shown and other entertainments, such as poetry and music by contemporary existentialist poets of San Francisco, were very fascinating, the latter being quite controversial. The "integral four", Les Graff, Jim Elliott, Bill Millott, and Dave Baravalle, discussed their exciting west coast trip and showed some interesting slides.

An exhibition of present and former students' work was exhibited at Coste House in March, and has had an exceptionally fine response. This exhibition, which was called X-57 for the year of its inception, was also sent to Prince Rupert and Edmonton. In future years it is hoped that this annual exhibition will reach audiences all across Canada.

Executive directors for the term were President, Deli Sacilotto; Vice-President, Dave Baravalle; Secretary-Treasurer, Anne Walesky; and Programme Committee Chairman, Roy Wreggitt.

AUTO CLUB

The Auto Club, organized three years ago, has expanded and become a very active club for the Automotive students. The club meets every two weeks, when educational films on the automotive industry are shown. This year, among other activities, the Auto Club sponsored June Strosher for Auto Queen in the Tech Queen Contest.

Major club accomplishments are the building up of a very large library of trade magazines and manuals, which is expanding each year, and circulation of a questionnaire among graduates in order to obtain better information on job conditions and the industry's requirements.

The club officers for this year were:

President	Bill Graham
Vice-President	Gordon Wandrum
Secretary	Allen Cameron
Treasurer	Ed Barabash

The club was ably guided by Mr. G. A. Sexton, Mr. N. G. Tweedle, and Mr. J. R. White in all activities.

BADMINTON CLUB

Badminton is one of the most active sports on the Tech campus. Participants come from different departments to display their skill in handling a racket and a birdie. Still others played their first games this year. Although the boys outnumber the girls considerably, many new acquaintances have been made.

Badminton is played every Saturday afternoon in the gymnasium, and every second Monday night at Balmoral Junior High School, owing to the limited space available in the gymnasium. Some of the outstanding players were Jack Dzaman, Ted Caldsmit, Eddie Krakiwsky, and Fred Harcoff. Many others displayed excellent form after only a few games.

A tournament is planned for March 1st at Mount Royal, where two doubles of boys, two doubles of girls, singles of each, and mixed teams are to compete against Mount Royal and Varsity.

Executive members for the club were: George Campsall, President; Dale Hunter, Vice-President; and Mary Zawaliy, Secretary. The members hope that the Badminton Club in the future will be as successful as the one this year.

CAMERA CLUB

This year proved to be a very successful one for the Camera Club. There were fifteen paid members, all of whom enjoyed participating in the club's activities. Formal meetings were held only when necessary.

This year new portrait equipment was added to the dark-room. The club has experimented with portraiture with very promising results. In future, the club hopes to take care of all portraits and pictures for the Emery Weal and the Tech Art Record.

The Executive this year consisted of Fred Podovinikoff, President; John Blair, Vice-President; and Koert Dieterman, Secretary-Treasurer. The club has two staff sponsors: Mr. R. E. Smith and Mr. A. Cassley.

DRAMA SOCIETY

This year's Drama Society, under the capable direction of Mr. Parsons, has had a very successful term. Although the active membership was not large, those who did belong showed sincere interest.

The Fall executive consisted of Ev Andrews as President, Joan Nissen as Vice-President, and Eleanor Sytela as Secretary-Treasurer. Our first presentation of the year was the hill-billy comedy, "Itchin' to be Hitched", starring Mike Dean as Paw, Louise Johnson as Maw, Janet Wickenberg as Pearly Mae, Ev Andrews as Hank, Les Graff as Uncle Fred, Dale Austin as Clem, Jim Elliott as Preacher, and Eleanor Sytela as Lizzy. It was well received on both presentations, and took place in the Tech auditorium at noon hour on two successive days. The backstage help was very well handled, with real co-operation from everyone involved.

A variety show was also presented shortly before the Christmas holiday. A number of Drama Society members took part in this, including Mike Dean, Les Groff, and Jim Elliott, with Ev Andrews doing a wonderful job as director and also doing his own act. Some of these students also helped to provide the entertainment for the Banquet.

At the beginning of the second semester, a new executive was elected. Ev Andrews returned as President, Mike Dean was Vice-President, and Mary Porter, Secretary-Treasurer. Once again Joan Nissen acted as the society's representative to the Students' Council. Our second presentation, "The Mountain", by the Canadian playwright Norman Williams, was a serious type of drama which presented more of a challenge to those who took part in it. Les Graff played the part of Warren; Mike Dean, Graham; Jackie Stahelin, the part of Linda; John Kunz, the Proprietor; and Dale Austin was Kennedy.

BANQUET

Thirty-six years have passed since the first Tech Banquet was held, many traditions have risen during these thirty-six years, and many more will rise in the future. The students and staff who attended the annual Tech Banquet on February 7, 1958 added to the list of traditions when they filled the Palliser Room of the Palliser Hotel to full capacity and created one of the gayest, noisiest banquets in Tech history. Wailing sirens, blaring P.A. systems, whirling rattles, shouts and class yells left disturbed stomachs, but indicated a healthy rivalry.

The Art Department decorated the Palliser Room in a Stampede theme, while table decorations depicted conscientious endeavors on the part of different departments.

The toastmaster, Mr. D. C. Fleming, Acting Shop Director of the Institute called on Mr. Ed. Frederick, Student Council President; Acting Mayor Mr. J. J. Hanna; and Dr. A. L. Doucette, Director of the University of Alberta, Calgary to give speeches. During intervals between talks, entertainment was provided by Tech students.

Mr. F. C. Jorgenson acted as master of ceremonies for the dance, which followed the banquet, and in doing so he provided an interesting, well-organized evening of dancing to the music of Harold Sokolofski's orchestra.

Carl Healey, Banquet Committee Chairman, would like to extend his thanks to those who formed the banquet committee, and to the students and staff who attended, for making this the biggest and one of the best banquets yet.

PROVINCIAL INSTITUTE OF TECHNOLOGY & ART

ELECTRONIC TECHNICIANS' CLUB

The activities of the 1957-58 season of the Electronics Club began in October with the election of officers. Ed Frederick was chosen as President, and Lloyd Johnson as Vice-President. The rest of the able executive included Bob Hahn as Secretary, Bob Swanson as Treasurer, and Bill Syrotuck as Social Convener.

The first meeting of the year was well attended, but the ball of enthusiasm was really fired by the promotion of a Tech Queen campaign. This was the first major project tackled by a single faculty and proved a real success. There were eight candidates for queen sponsored by various classes. Joyce Stevenson, the Electronics candidate, was elected Queen and crowned by Mayor Mackay at the Ball after narrowly escaping abduction by the Surveyors.

The school spirit sparked by this gala event carried over to February when Electronics offered a trophy to the class donating the most blood to the Red Cross. There was an excellent response and Electronics made a good showing, but were not quite red-blooded enough to beat the Surveyors.

Most of the year's activities culminate at the annual banquet and dance. The Electronics Club was not sleeping here either. A lot of work went into the timely and fascinating table displays. Even more work went into the class yell and dancing afterwards.

Following the banquet, it was time to get enthusiastic about exams — so very best wishes for as much success to next year's club members in their schedule of activities.

FOOD SERVICE TRAINING

The activities of the F.S.T. Club this year emphasized social events, experimenting with foreign cookery and many interesting demonstrations. The first social of the club consisted of a bowling meet, followed by an informal and very pleasant get-together featuring Russian food. Our annual Christmas party was a huge success with more turning out than expected. Games were enjoyed along with carol singing around the Christmas tree, followed by a very colourful Santa Claus parade. A magnificent cold buffet was put up by the club, after which there was dancing.

The arrival of eighteen Indian and Eskimo girls from Aklavik was the occasion for a delightful social that featured bowling, and a delicious European mixed buffet created by the F.S.T. Club. Miss Taylor, who was in charge of the girls, showed the very colourful film she herself had taken while in Central America.

As in past years, the annual Tech Banquet was a huge success. The club set up an attractive shellfish display on the F.S.T. table and enjoyed the supper and dance at the Palliser very much. Throughout the year the club members were greatly honoured by being included in most of the Canadian Restaurant Association's meetings and social nights. These were very informative and a lot of fun. Biggest thrill for the club was an associate membership in the newly founded Calgary Culinary Association. We enjoyed their meetings and demonstrations immensely.

Yes, the F.S.T. Club has had a very full and enjoyable year, and we sincerely hope that following classes will enjoy the club as much as we.

HAM CLUB

The Ham Club was formed in the middle of November. Although attendance was good at the start, members have been dropping by the wayside since.

The routine of student instruction has been carried out by Mr. C. M. Johnson, our instructor in Commercial Wireless Operating, while the amateur class has been under the supervision of the Commercial Wireless students during the noon hour, Mondays, Wednesdays, and Fridays.

Several of the students have worked outside stations from VE6IT, our Ham station. In general, the club feels its present scheme is a grand opportunity for students to obtain their Ham tickets, an accomplishment well worth the time and effort.

EMERY WEAL

As Tech gradually expands and improves, so should the Emery Weal. This year changes were made in the background paper, printing and costs. Although the first issue was on newsprint, the remaining ones were printed on white paper. This made the printing much more impressive and easier to read.

The paper was photographed instead of being typeset and, even though this process meant a great deal more work and extra time for the Emery Weal staff, it has proved to be quite effective. In addition, a new company was chosen to do the printing. As a result of these improvements and the elimination of advertisements, all the costs, which the Students' Association assumes, were greatly reduced.

I would like to express my sincere thanks to Bill Graham, our capable Business Manager, and to the rest of the staff: to Doris Hollihan, Cal Litzenberger, John Blair, Lorena Norton, Margaret Litchfield, Maurice Jones, Gary Nicolson, Fred Harcoff, and Marie Boykiw for their fine work. Appreciation also, for their advice and encouragement, goes to the staff sponsors, Mr. D. A. Gaudette, Mr. J. A. Bradley, and Mr. C. J. Hollingworth.

I have thoroughly enjoyed being editor of the Emery Weal for the 1957-58 term. It is my hope that future editors will also find pleasure in this rewarding position. To them and their staffs I wish a sincere "Good Luck" with the Emery Weals to come.

SONJA VEITCH,
Editor,
Lab Tech 2.

LABORATORY TECHNICIANS' CLUB

The Industrial Laboratory Technicians' Association has just completed one of its most successful years since its inception three years ago. Under the staff advisor, Mr. F. Cornett-Ching, and with the help of our department head, Mr. N. Safran, we have been able to obtain our affiliate membership with the Chemical Institute of Canada. Also, we have obtained permission for our graduating students to write the C.I.C. exams in the spring if they so desire. The writing of these exams will be a great step towards a professional status in the field of chemistry.

The club this year has endeavoured to have one major speaker a month from various industries in Alberta, as well as the showing of technical films once a week.

The main social event of the year was the annual Lab Tech banquet and dance held in the Fiesta Room of the Beacon Hotel on March 15. This event was attended by the majority of students and staff. The club also sponsored a dance, for the first time following the old-time Western theme. It is to be hoped that this will become an annual affair sponsored by the Lab Tech's.

HOUSE LEAGUE HOCKEY

After Christmas the Inter-House Hockey League schedule was drawn up. Twelve enthusiastic departmental teams entered the League, with the schedule commencing on January 15. The late start was due to the weather conditions, but even with this set-back the hockey season was very successful.

As the season draws to a close we find Survey leading the race undefeated and the Art Department holding second place. Aero III and Agricultural Mechanics are having a tight battle for third place. These top four will be represented in the playoffs which begin in the latter part of February.

Only time will tell which class will win the championship, but with such a close contest in the League it is evident that each team will have to do its very best to be the champion.

I.O.T.A.

The IOTA Society is the club exclusively for the Tech girls. It is a social and educational club. A lounge furnished with chesterfields, and containing a radio, a record player, magazines and books, is the meeting place of the club members.

Functions got underway with a bang when the second years played hostess to the first years at a "Big Sister" coffee party. Everyone enjoyed this party, particularly because it enabled those from different classes to get to know each other. The main social function sponsored by the society was the gala "Jingle Fling" at Christmas time. The large crowd in attendance made evident the success of the dance. Other activities included film nights, a skating party, a candy sale, and the annual IOTA banquet.

Throughout, the society has been fortunate in having Mrs. Trussler for an advisor. She is always ready to help.

1957-58 Executive

Staff Advisor	Mrs. R. S. Trussler
President	Elaine McLaren
Vice-President	Elfie Parrott
Secretary	Lorena Norton
Treasurer	Margaret Litchfield

Committee

Interior Decorator	Noel McArthur
Social Convenor	Doris Hollihan
Social Service	Joan Morton
Education	Mary Zawaliy

KILO-VOLT-AMP CLUB

It wasn't an H-bomb, it wasn't even an A-bomb, it was just the first meeting of the K.V.A. Club for 1957. Enthusiasm was vigorously displayed during discussion of the year's forthcoming activities. It left no doubt that the forty-six members present (an all-time high) meant to make the K.V.A. Club most active. During November a new executive was elected, which led the club through the year under the able guidance of Mr. C. Ayles.

As a starter for the year's activities, a get-acquainted banquet was well attended. Other activities during the year included film nights, field trips, and social evenings, such as bowling nights and club gatherings. The club's special project for this year was the rebuilding of an ancient, almost antique, generator. The bearded Arabs, so noticeable around Tech during February and March, were the result of a beard-growing contest sponsored by the K.V.A. Club. The club's highlight of the year was the final banquet held in April. Thus closed an active year for the Electrics.

The Executive for the year was:

Club Advisor	Mr. C. Ayles
President	Bud Gau
Vice-President	Sam Gould
Secretary-Treasurer	Ed Charehuk

SKI CLUB

The Tech Ski Club under the sponsorship of Mr. L. R. McIlveen boasted a membership of fourteen skiers during the 1957-1958 season.

The club meetings were composed of both business and social activities. The social activities were in the form of a number of ski films, whereas the business meetings were conducted primarily to organize a Tech Ski Team for the Intercollegiate Ski Meet at Mount Temple. The members of the Tech Ski Team were: Jim Davies, Ken Jordet, Hans Nederveen and Hans Soderstrom.

The executive of the club was composed of: Bob Nelson, President; Jim Davies, Vice-President; and Audrey Belmas, Secretary.

Although the ski slopes were nearly snowless for many weekends, the skiers enjoyed journeys deep into the mountains to better skiing areas.

STUDENT CHRISTIAN MOVEMENT

An S.C.M. group was formed for the 1957-1958 term. In October Mr. V. J. Pennells, the staff sponsor of the group, assisted students to form a discussion group. The group gathered once a week under the leadership of Reverend S. Wilk, representative of the Presbytery of Calgary to the S.C.M. The topics in the discussions included such things as, "Science and Religion", and "Family Problems".

The group also had a few social evenings which were held in conjunction with the University branch of the S.C.M. These evenings included picture shows, speakers and lunches.

As well as Mr. V. J. Pennells as staff sponsor, the group had Graham Norman as president, Herman Schultz as book steward, and Ed Wysoeki as advertising manager.

SURVEY CLUB

The executive of our club really outdid themselves this year. Besides carrying out their regular duties, they contacted the secretary of the Modern College of Business (Girls galore) and arranged for the two clubs to get together at two dances and a hay ride. It was a nice arrangement and everyone enjoyed himself.

We hope to go on a field trip in late March or early April. It will be good experience in some phase of practical surveying. The trip last year to Great Falls will never be forgotten.

The big brave surveyors won the trophy for having one hundred per cent attendance at the Red Cross Blood Donors Clinic. There were no fatalities.

The year also had its misfortunes as one of the students was stricken with 'flu complications. He spent many weeks at the hospital at considerable cost. A benefit dance was held for him on February 28, with all proceeds going towards his hospital expenses. The only other misfortune was that several of the fellows got caught in the bonds of paternity.

The year's activities will end with the election of a new executive. The annual wiener roast will be held before final examinations.

Those in this year's executive were:

President	Barry Code
Vice-President	Joe Ganske
Secretary-Treasurer	Darryl Tronnes
Staff Advisor	Mr. E. J. Clark

TECH ORCHESTRA

The Tech Dance Band was organized three years ago by Mr. E. Wood for the benefit of students who play musical instruments. Since then the band has played for noon dances once a week, and practised the remaining four days of the week.

Members of the band are:

Conductor and Drums — Mr. E. Wood
Piano — Sharon Oborne (Lab Tech 1).

Trumpets

Lead — Mr. M. McDougall
Second — Boh Hahn (Radio 1).
Third — Larry Brown (Radio 1).

Trombones

Lead — Jim Crook (Aero 1).
Second — Bob Brodie (Radio 1).

Alto Saxes

Leads — Joan Morton (Lab Tech 2).
— Gordie Roadhouse (Electrics 1).
Thirds — Al Cameron (Auto 2).
— Wayne Watson (Lab Tech 1).
Fifth — Les Lehr (Radio 2).

Tenor Saxes

Second — Blake Gordon
Fourth — Bob Blackmore

DOODLERS

Four years ago the Doodlers sang at Tech for the first time. Since then they have sung not only at many Tech functions but also at night clubs and in banquet halls.

The four boys (Doug Haynes, Bill Brownridge, Ken Samuelson and Deli Sacilotto) are 1958 graduates of the Art Department. Graduation brings to an end their student years at Tech and their fun in the entertainment field. They have thoroughly enjoyed both their class work and all the extra-curricular activities in which they have played such an important part.

The miracle on your wall

Behind the familiar wall switch lies the far-sighted planning and ingenuity of Canada's electrical industry that provides the low-cost power and efficient equipment which is helping to raise our standard of living.

When you want light in a room, you just flick a switch. It's as simple as that. And, if that minor miracle is taken for granted, consider a few of the other tasks electricity performs in the home.

It cooks complete meals while you are out—takes the labour out of cleaning, polishing, washing and ironing—keeps perishable foods in perfect condition, for months if necessary—supplies constant hot water—brings you radio and television entertainment—and helps to keep your home cosily warm in winter and delightfully cool in summer. This is fast becoming the pattern of living in even remote Canadian homes today.

While the role played by electricity in the home naturally looms large with all of us, it should always be remembered that by far the larger part of the power generated is used by industry. In fact, it is primarily because of the availability of this dependable source of power that Canada has been able

to develop her aluminum, pulp and paper, mining and manufacturing industries to their present position—which, indirectly, adds to the prosperity of all Canadians.

When you flip that familiar switch on the wall, have you ever given a thought to the amazingly intricate system of power equipment that lies behind it?

From the start, the story of Canada's electric utilities has been one of phenomenal increases in demand for power being constantly met, with the result that Canada has become one of the most highly electrified nations in the world. And, as always with this enlightened industry, tomorrow's needs are being taken care of by today's planning.

This Company engineers, manufactures and supplies a complete line of electrical equipment including generators, transformers, switchgear, wire and cable for the generation, transmission and distribution of electric power—as well as the motors and control, electronic devices, appliances, lamps and other products that put it to work.

We, of Canadian General Electric, take pride in the fact that electric power has become the pulse of the Canadian way of life because—as Canada's oldest and largest electrical manufacturer—we have helped to make it so.

Written on one of the clean white Tech hallways, "Fight Vandalism!"

During the football season, what a wonderful country this is! It's the only country where you can walk down the street with a girl on your arm and carry a bottle and a blanket and no one says a word.

This is also the only country where we are able to drive downtown in our new car to pick up our unemployment cheque.

A wife is somebody who wants you to stay close to her at parties so she can ignore you better.

And then there was the burglar whose wife pestered him for money. Finally, he said, "Oh, all right — I'll get you some as soon as the bank closes!"

As a junior-high-school teacher distributed the first report cards of the year, she noticed that one blond teenager was scowling. "What's the matter? Aren't you satisfied with your marks?" she asked.

"I certainly am not," said the girl. "You gave me an F in sex and I didn't even know I was taking it!"

"I want a ticket for Myrtle."

Ticket agent, after wearily thumbing through the railroad guides, "Where is Myrtle?"
"Settin' over there on that bench."

"I can't understand why you scratched that wonderful fellow off your list. Think of those smiling Irish eyes, that Grecian nose, that Viking physique."

"Yes, but don't forget those Roman hands and Russian fingers."

Congratulations

. . . and best wishes to the graduands of 1958 going forth to take their place in our society as capable, fully-trained citizens.

We hope you will choose to make your home in Alberta where the Future holds great promise for the willing worker.

"I want the money for this bond," an attractive young girl told the bank teller, handing him a bond less than four years old. The teller told her the redemption value.

"But it says \$50!" she protested.

"This bond isn't due for six years," the teller explained.

"I know you're wrong!" she insisted. "My grandmother gave me this bond for my 14th birthday, and she told me that at maturity I could collect \$50 for it. I'm 18 today — and if that's not maturity, what is?"

Sign in the lobby of a local Calgary theatre showing The Ten Commandments: "Thou Shalt Not Smoke."

A headwaiter's wife was seeing him off after breakfast. "Now have you got everything, dear?" she asked. "Your hat, your wallet, your snarl?"

Food for Body and Mind

Whatever skills you learn at "Tech" and whatever trade you follow in the future you should always remember that the food which will sustain you through life is produced from the soil.

Specialized skill is valuable, but general knowledge and broadmindedness are also important. All sections of people are dependent on each other but none can exist without food. Everyone should realize and appreciate the importance of the service rendered to society by the farmer and see that his problems receive fair consideration.

FOR GRADUATE SEEKING A FUTURE

There are over 50 Varieties of Jobs the Hudson's Bay Company !

Wherever your particular talents lie, buying, selling, personnel, accounting, publicity or management . . . at "The Bay" you'll find a wonderfully diversified field of opportunity.

Jobs-with-a-future, limited only by your own capabilities and initiative. We try to place you where you will most enjoy the work you do, because we know that getting the right job for the person is just as important as getting the right person for the job. Our Personnel Office will be happy to tell you more about the possibilities for a professional career with the Hudson's Bay Company.

A small town is where everybody knows whose cheque is good and whose husband isn't.

Annd wictch Inglish instruetor iz so populler with the stoddents that he reseeves Valentine cards and red appels frum them?

An interviewer in an employment office was talking with an attractive young miss. She answered all the usual questions: name, address, work experience.

"Do you have any physical handicaps?" she was asked.

Her eyes widened and her lips rounded in surprise. "Oh, no sir," she responded, "they have always been assets!"

UNCERTAIN ANSWER

Why do things at one time
Seem so bright
And only minutes later seem
As dark as night?

Why is this so?
There seems to be a mode to follow
Or so men say,
But in this mode I only wallow
Oh! If only my ideas would transpire
Into something real, not hollow.

There is only one who has the power
To say the final word
That single soul is I myself,
But I know only what I've heard.

Some people say, that's good!
Others say, that's bad!
Ah! but there's only one way
To find out who the wisdom had
And it's not written down
In any book
That may be on the shelf.

It's not there I know,
But where, where,
Where could the answer be,
To this that is bothering me?

LLOYD D. CHESSER

ULTIMA THULE

There's something in life I cannot find
Something preying on my mind.
There is something out there that I cannot
That I cannot grasp or bring to me. see

If only I knew what it could be
I'd be like a blind man learned to see.
I'd be the happiest man that ever lived
If only I could vision it.

There's something in life I cannot find
I'd like to settle in my mind.
I wish I knew what it could be
That I cannot grasp or bring to me.

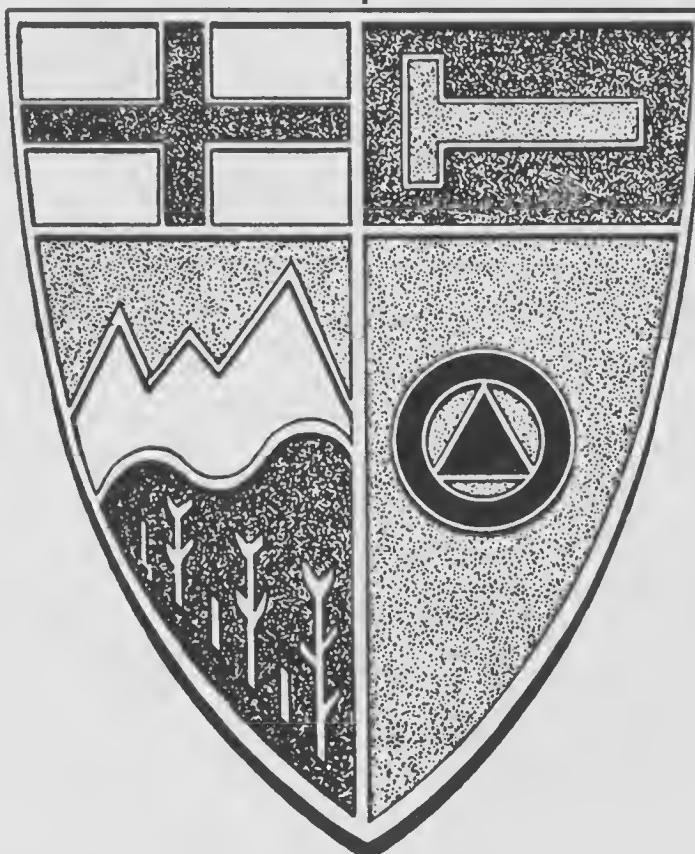

LLOYD D. CHESSER
